

GEOCON SITE INVESTIGATIONS

Newsletter issue 5 Summer 2019

RECENT NEW APPOINTMENTS

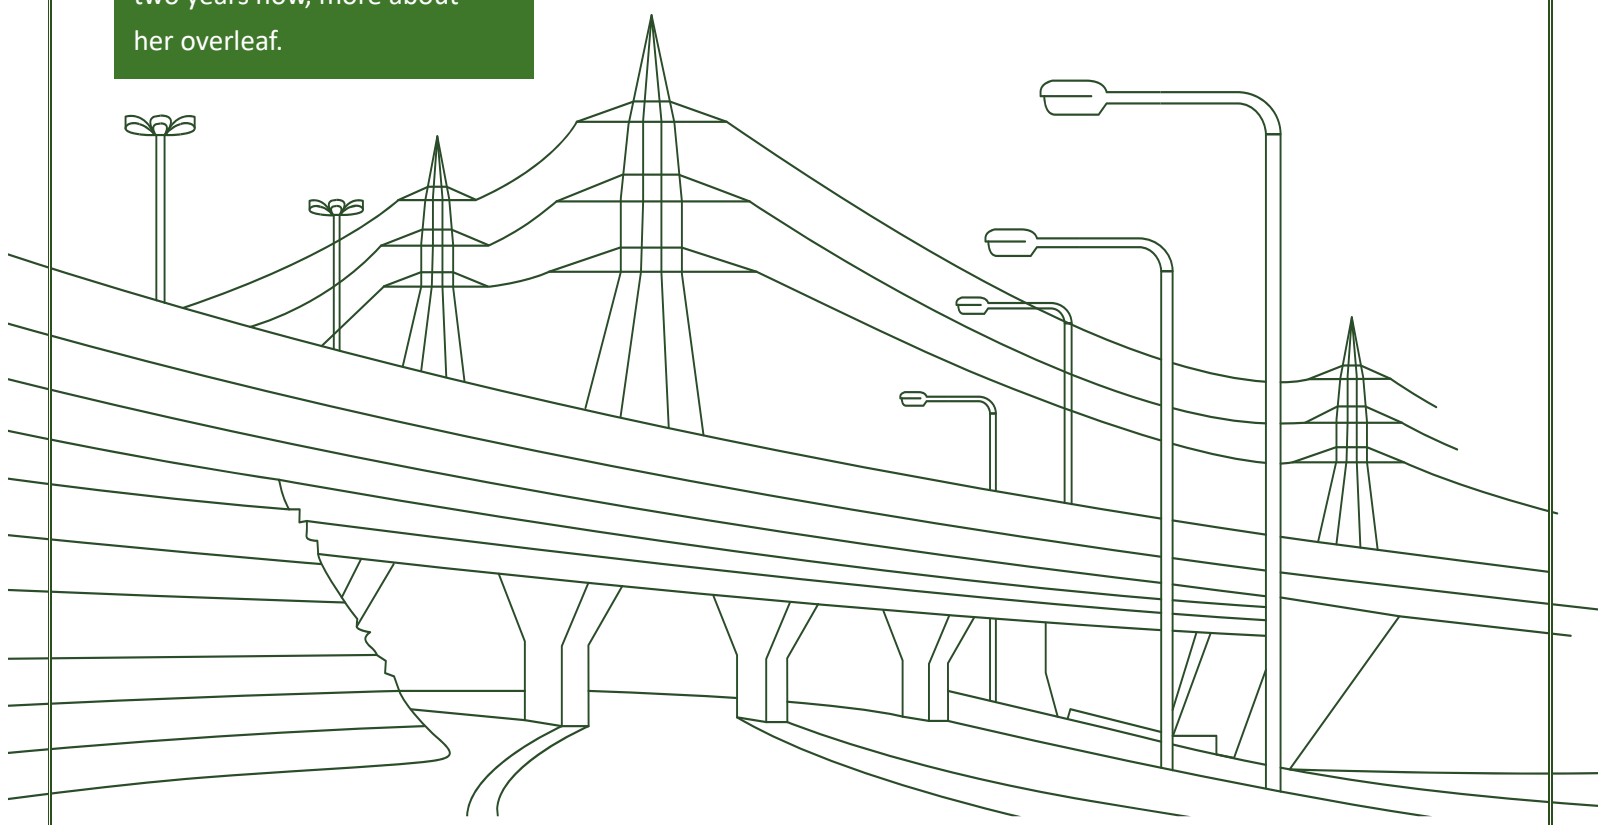

We are pleased to welcome two new junior Engineering Geologists, Tom and Sean. They have joined us to fill the roles left vacant by Felicity and Naomi moving up the career path. Neither Felicity nor Naomi will be giving up fieldwork completely, but they will be harder to spot out there in their high viz coats!

Felicity has been with us for two years now, more about her overleaf.

Welcome to our fifth newsletter, a little later than usual, the summer has sneaked up on us, that's how busy we've been.

Mid-year review:

Back in April we undertook our first exhibition, taking a stand at the National Construction Expo in Milton Keynes. We were very pleased with the level of interest and have now caught the exhibition bug. We will be sure to notify our clients as to where you'll find us next.

Meet the team: Felicity

Felicity is a Geoscientist with two years' experience in the industry and 1 year in GIS, after graduating from Keele University with a BSc (Hons) Geoscience in 2015. Felicity joined GeoCon in the summer of 2017 as a field engineer and has worked her way up into project management, she is now an integral part of the team.

Outside the office Felicity enjoys yoga, ice skating and volunteering with the girl guides.

IN OTHER NEWS.....

- Residential development seems to be continuing apace; GeoCon work for several residential developers of all sizes around the country and we are as busy as ever investigating new sites for them.
- Our infrastructure work doesn't seem to be getting any quieter, during the first half of this year, amongst several infrastructure related instructions was site investigation work for major highway developments near both Chelmsford and Southampton.
- Our Plate Load Testing team also seem to be getting busier and busier, mainly for crane lifts; another indicator that development work continues to drive the site investigation sector.

- And finally, our business development team have also been on the lookout for even more interesting places to go and sites to investigate. We hope to be able to report back to you next time about some of these interesting developments.
- As GeoCon continues to expand we are always on the lookout for new ways to extend our knowledge base. So, don't feel that your issue may not be one we can resolve – try us and see!
